

Syngrafii enables you to Sign Anything, Anywhere, Any Time from Any Device, Securely

Syngrafii Paper™ (sPaper™), is a Signature Solution that delivers compliance controls that applies wet ink single use original signatures on paper based physical documents, in electronic form. Hosted either in a Cloud or on Premises, sPaper™ launches as an HTML5 based web application that does not require additional plug-in installation and can be used on any Internet enabled device.

Built to seamlessly integrate with Syngrafii LongPen™ Printers, this dual workflow Compliant Signing Solution advances Syngrafii's offering of Single Use Wet Ink on paper signings to encompass electronic Wet ink signings on all mobile and desktop platforms.

We enable 2 or more parties to complete transactions from anywhere worldwide, removing the delays & barriers associated with in-person paper based transactions.

Market Differentiator: We are the only Signature solution worldwide that enables users to execute an original one-time use signature onto paper, a digital document or a hybrid process while supporting an organization's security, compliance and workflow requirements.

Why Choose Syngrafii

- Syngrafii is the only e-Signature company in the world that brings the security & the case law associated with the execution of paper documents into the fast lane of the digital age.
- Syngrafii is the only e-Signature company worldwide that provides the proprietary option of executing original biometric ink signatures onto hard copy and electronic documents when and where you want.
- Choose your workflow, your document platform, and the systems you want to enable with e-Signatures. Syngrafii delivers original one time use Wet signatures in both LongPen™ and sPaper™ solutions along with a detailed audit history for security, compliance and non-repudiation.

Syngrafii Vision

- A connected world in which people, enterprise and government will process original documents over any medium at the speed of light.
- A unified world that blends the tradition, intent and law of paper and a human signature with the speed, efficiency and creative potential of the internet.
- A more secure world where an individual's signature is a universal guarantee of their intent.

Syngrafii Solution Value

Syngrafii will enable our clients to achieve, among other things:

- To greatly reduced Key Executive travel time and costs
- A reduction of their carbon footprint
- A reduced cost and reliance on courier services for original document transmittal
- Ability to immediately respond in a cost effective manner to business tenders
- To add a Security layer of control, compliance and legal enforceability

Syngrafii feels strongly that in addition to addressing currently identified industry challenges noted above that the deployment and use of our sPaper™ will further enhance and provide a higher degree of flexibility and control for managing any diverse business operation. The focus is on reducing Operational Risks while ensuring organizations meet their corporate governance and compliance standards.

Syngrafii Paper™ – Giving You Control of Your Workflow

Like real paper, sPaper™ allows subscribers to use PDF or Word documents, from our built-in Microsoft Office add-in, to create a document that remote signers can freely annotate and sign. sPaper™ documents require little if any preprocessing; requires a signer to execute their original single use signature in all areas of a document that need to be signed; signatures are unique and cannot be copied or pasted. Proxy signatures (one signature image stored and reused over and over) and click-to-sign signatures are not supported.

sPaper™ transactions ensure the validity of each signature and leverages over 100 years of Wet Ink on Paper case law for the purposes of intent and non-repudiation. sPaper™ easily attaches photo identification such as passport or driver's license to the security and compliance certificate.

Syngrafii's server software and APIs simplify workflows and document management. Documents can be shared and executed in a co-browse environment with the signer utilizing their personal mobile device as a signature capture tablet. This further triangulates the signature, to the document, to the signer's personal property.

Syngrafii MasterFile™ Compliance Software provides a complete audit trail of all document activities and signatures providing excellent repudiation defense. To further harden online transactions, sPaper™ supports the integration of recorded video to provide the gold standard in remote paper and electronic paper document execution.
